

WHEN DID YOUR TEAM LAST GET A SKIN CHECK?

2 in 3 people will be diagnosed with some form of skin cancer before the age of 70.

Some facts

Australia has one of the highest rates of skin cancer in the world, with 2 in 3 people being diagnosed with some form of skin cancer before the age of 70. Skin Checks play a significant role in the early detection of skin cancer, and you can make them more accessible to your employees by including them in your **Workplace Wellbeing Offerings**. Skin cancer is easiest to prevent if it is detected early, which is where CU Health can support your business with on-site skin checks for your team.

Give the gift of health

In many cases, your people are the most valuable resource within your organisation. Providing healthcare as part of the investment you make in your team goes a long way. Employees who are looked after by their employer tend to be more loyal and engaged than those who do not feel valued. **Why not give your team the gift of health?**

Our services

Onsite comprehensive skin screening

Full-body skin checks; by a certified Healthcare Professional. Completed onsite at your office

Referral (if required)

Referral letter from a GP if further assessment is required.

Education on skin health

Individualised education on skin health and how to protect your skin between checks.
